

LED MELLOTONE

With a warm colour temperature of 2400K, the MEGAMAN® LED Mellotone series is designed to deliver harmonious illumination to create a warm and cosy environment. When these lamps are used in a room with wooden wall panels or furniture, a comfortable and inviting environment is easily achieved.

LED Mellotone makes specific commercial environments such as hotels, restaurants and furniture stores even more attractive and inspiring for their customers. It is also popular for bakery lighting and presents a cosy shopping environment and vibrant pastries and breads.
