About MEGAMAN®

Who We Are

Artificial light enhances the way we live and work. It brings us safety, comfort and productivity. Originated in Germany, MEGAMAN® is committed to providing light in a way that is truly sustainable energy-saving and of such a quality that it brings a positive difference into the lives of all who use the company's innovative LED lighting solutions.

MEGAMAN® is proud to be the only major brand to have exclusively manufactured low-energy lighting products throughout its entire history, offering more than 25 years of industry expertise and innovation to the lighting market.

Beginning in 1994 with the highly successful production of CFL light sources, MEGAMAN® has evolved to become a complete low-energy lighting solutions provider. MEGAMAN® has built a reputation for producing high-performance LED light sources that offer a true replacement for traditional metal halide and halogen – combining quality lighting performance with substantial energy savings.

MEGAMAN® is now applying its market-leading experience to an even wider range of lighting solutions including revolutionary Smart Lighting control, a full range of components and a suite of low-energy fixtures.

- *INGENIUM®* ZB Smart Lighting Solution provides further energy saving potential for users and allows them have full control of smart devices via mobile app from anywhere in the world
- An extensive range of Luminaires and Lamps are developed for both indoor and outdoor applications across diverse industries
- TECOH® high performance LED Components are designed indifferent shapes, sizes and lumen packages to meet customer specifications
- MEGAMAN®'s lighting products are distributed throughout the world mainly in Europe, Middle East and Asia
- Our advanced Research and Development facilities will ensure a continuous supply of innovative and sustainable lighting products in the market

MEGAMAN® continues to play a leading role in combating climate change and carbon emissions by pursuing continuous innovation in the production of low-energy lighting solutions.

MEGAMAN® Milestones

2018	Launched Dual Beam Technology (DBT) which empowers to have two beam angles in one single lamp/luminaire
2016	Launched U-DIM™ technology offers seamless dimming and is compatible with the widest range of existing dimmers
2015	Launched Hybrid Reflector technology with excellent optics, efficacy and beam control
2014	Launched <i>INGENIUM®</i> ZB smart lighting solution which is scalable and extendable for home and commercial spaces
2013	Launched first smart lighting range, <i>INGENIUM®</i> BLU Industry first full range of Dim to Warm LED products
2012	Integrated LED luminaires introduced
2011	Patented LED module and light engine - TECOH® MHx and TECOH® CFx TECOH® CFx - World's first 2000lm Zhaga Book2 Certified Light Engine
2010	R9 technology introduced to LED range
2009	Launched the first MEGAMAN® LED Candle and Classic
2008	Innovative Thermal Conductive Highway™ (TCH) technology incorporated into MEGAMAN® LED reflectors
2007	Amalgam technology is employed in full CFL range
2005	<i>DIMMERABLE®</i> technology introduced to CFL range
2004	DorS technology introduced to CFL range Industry first RoHS compliant CFL
2002	<i>INGENIUM®</i> technology is introduced to CFL lamps for long life and short preheating time
2001	Industry first CFL GU10 reflector launched. Introduced Silicone Protection technology to CFL range
1999	Patented Cooling-Tube technology introduced to CFL range
1997	Industry first candle-shaped CFL launched
1996	Industry first classic-shaped CFL launched
1994	MEGAMAN® incorporated in Germany

Rigorous Quality and Management Systems

All MEGAMAN® products are designed, tested and produced in our factories in Xiamen, China. Standards have been implemented factory-wide to ensure the MEGAMAN® manufacturing processes deliver innovative, reliable and safe products with high-quality standards now and in the future.

To ensure that MEGAMAN® products comply with the highest quality standards, the manufacturing plants are equipped with their own assembly lines. The in-house laboratory is IOS 17025 certified by CNAs, and is eligible to perform on-site testing for Dekra and TÜV Rheinland.

The MEGAMAN® business runs under the most stringent management and quality systems. The green elements of production process are maximized, employee welfare is prioritized and the company is socially responsible to the local community. To continually develop these areas, MEGAMAN® has undertaken a range of international accreditations. These include:

Quality Management System

MEGAMAN® products are manufactured and certified to ISO 9001:2015, ISO 14001:2015, OHSAS 18001:2007 and SA 8000:2014.

Corporate Social Responsibility

MEGAMAN® has received OHSAS 18001:2007 and SA8000:2014 confirming the level of care for employees and reinforcing the company's pledge to be socially responsible.

Controlling the Use of Hazardous Substances

MEGAMAN® products meet international quality standard and the manufacturing processes are closely monitored to ensure ultimate control of hazardous substances.

Product Quality Assurance

MEGAMAN® products are made using premium quality materials and innovative technologies within stringent control measures, to deliver maximum performance and energy efficiencies.

Innovative and Unique Products

With our patented LED design and technology, the MEGAMAN® LED products are able to deliver superb performance, including low power consumption, excellent light output and low maintenance costs. They provide the highest quality lighting performance of any LED based product on the market consuming the same power!

A new era in LED lighting solutions.

Unique Features

- Energy efficient replacement for traditional metal halide, CFL, halogen and incandescent lamps
- Deliver superb lighting performance
- High luminous efficacy up to 177lm/W
- High lumen maintenance rated lumen maintenance of 70% (L70) at up to 50,000 hours
- Long rated life up to 50,000 hours
- High colour rendering up to Ra97
- High colour temperature consistency
- Enhanced colour applications of Perfect White, Dim to Warm and RichColour series
- Options of different beam angles for the LED Reflector range
- Up to 91% energy savings
- Simple installation and servicing
- No UV and IR radiation

Additional Benefits

- Mercury-free
- Instant start-up
- Wide range of operating temperatures

Applications

- Boutiques / Shops
- Shopping Malls
- Hotels / Restaurants / Lounges
- Museums
- Galleries
- Offices
- Household

PRODUCT SERIES

As a leading innovator of LED technology, MEGAMAN® has developed an extensive range of LED products for various domestic and commercial applications. Our products are classified into four categories, namely Professional, Smart, Economy and Go-To-Market series. Each series has its own features designed to meet every need of consumers and professionals.

Professional Series

Suitable for commercial and high-end interior applications, the Professional series delivers high quality and comfortable light sources. This series possesses the advantages of powerful lighting performance, perfect optical design and excellent colour rendering. Having a similar profile and outlook to traditional halogen lamps, the MEGAMAN® LED reflector in Professional series is designed with unique technology such as our Hybrid Reflector and Dual Beam Technology (DBT) which offers a flexible choice of beam angles in one single luminaire.

Smart Series

This series is a value-added option for consumers looking for high quality lighting at affordable prices. Featuring superb light output with high efficacy and performance, the Smart series is an ideal replacement for traditional incandescent or halogen lamps. The benefits of energy savings up to 90% and longer lamp life add to its appeal for consumers.

Economy Series

The most economical option among all series which serves an entry-level LED solution to replace halogen, incandescent and CFL lamps. Its long rated lamp life and high energy savings provide all the advantages you expect over traditional lighting products, but with the MEGAMAN® guarantee of quality.

Go-To-Market(GTM) Series

MEGAMAN® has newly launched the Go-To-Market (GTM) Series which targets new customers with incentive price. This series underlines the fact that it can be applied from launching new products or even moving a current product into a new market. This is a pricing strategy where the price of a product is initially set low to rapidly reach a wide fraction of the market.

LED by
MEGAMAN®

Dual Beam Technology

Two Beam Angles in One Luminaire

MEGAMAN® pioneered an innovative approach for switching the size of the light spot with a simple push action on luminaires featured with Dual Beam Technology. With this technology one can shape the light spot of the luminaire from a narrow beam to a wider beam angle.

The term “Dual Beam” refers to the dual function of a luminaire. It can be set to project a narrow beam or a wider beam. Luminaires with “Dual Beam” function provide users unparalleled flexibility and convenience when adjusting the contrast between ambient and accent lighting on-site, eliminating the hustle and bustle of changing luminaire with a different beam angle. In some cases, fixtures with specific beam angle are not readily available and subsequent arrangement will cause inevitable delay in completing projects. Choosing luminaires equipped with MEGAMAN®’s Dual Beam Technology will put you at ease when doing projects.

How It Works

The mechanism that makes Dual Beam illumination possible is cleverly engineered into the DBT-enabled luminaire. To shape the beam angle of such luminaire, simply apply a push action on the front lens. This unique mechanism enables users to switch beam angles instantly from a narrow beam to a wider beam and vice versa.

Let us take one luminaire model as an example. As shown below, the default beam angle setting is 24° (the lens is in an extended position - Fig 1). By applying a push action on the front lens, users can adjust the beam angle to as broad as 36° or 45° (subject to model number) as the front lens is pushed to a retracted position - Fig 2.

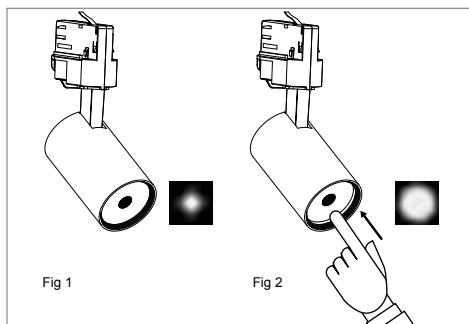

Fig 1: The lens in extended position, producing narrow beam light effect.
Fig 2: The lens in retracted position, producing wider beam light effect.

U-DIM™

Flicker free dimming compatible with widest range of existing dimmers

With the phase out of high-energy consuming traditional light sources, lighting manufacturers have a responsibility to make it as easy as possible for consumers to make the switch to LED lighting. It is with this in mind that MEGAMAN® has developed a revolutionary U-DIM™ technology that makes switching to LED easy.

Over the years traditional light sources have required different types of dimmers depending on their technology. The revolution that LED brings to lighting by replacing all types of conventional sources means a universal solution is required for LED to dim on all these existing circuits.

Up to now, when replacing traditional lamps with LED, working with an incompatible dimmer may have caused a multitude of issues from flickering to failure. MEGAMAN® lamps with U-DIM™ is a breakthrough in dimming technology and makes our lamps compatible with the widest possible range of existing dimmers, whether they are Leading-edge or Trailing-edge. It is easy to use, you just 'plug & play' so it takes the headache out of upgrading your lighting scheme. MEGAMAN® U-DIM™ also allows superior performance, flicker-free dimming from 100% right down to just 5%; combine this with our latest Dim to Warm technology and you can even have the exact same warmth as halogen when dimmed for a cosy ambience.

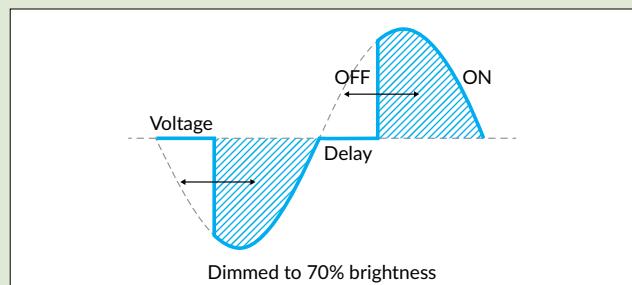

U-DIM™ technology will be offered as standard with MEGAMAN® lamps using eye-catching hybrid reflector technology. With mains voltage halogen reflector lamps being phased out in the EU from September 1st 2016, this means you can rely on MEGAMAN® LEDs to replace your halogen lamps in terms of dimming compatibility, performance and aesthetics, while benefiting from the energy-savings offered by LED technology.

Leading-edge and Trailing-edge are the most popular dimmers used for conventional light sources. They work by chopping out parts of the voltage and reducing power to the light source in order to achieve the dimming performance.

Leading-edge

also known as 'forward-phase control dimmers', 'triac dimmers' or 'incandescent dimmers'

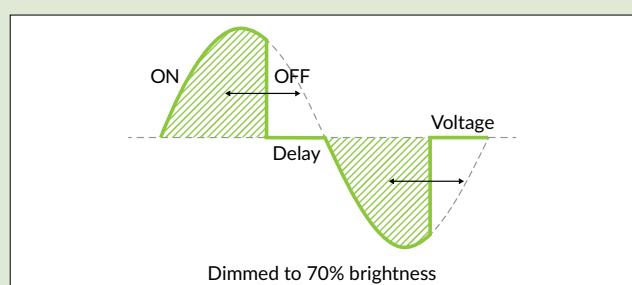

Leading-edge dimmer switches were used originally to dim incandescent and halogen lamps magnetic low voltage transformers.

Trailing-edge

also known as 'reverse-phase control dimmer' or 'electronic dimmers'

Trailing-edge dimmers are traditionally used for electronic drivers or low voltage transformers (capacitive loads).

Perfect White

Brings whites to life

MEGAMAN® Perfect White technology is a solution that offers retailers a distinct advantage enhancing textiles by bringing whites to life while still offering superb efficacy and energy efficiency, compared to traditional light sources. It is ideally suited for retail lighting as well as other accent and display applications.

The Perfect White range produces a high quality light that mimics the effect of daylight on white objects, giving them a natural vibrancy that makes them stand out from crowd.

Designed to replace 75W halogen AR111, MEGAMAN® LED AR111 reflectors with Perfect white Technology saves up to 84% of energy while delivering excellent light output. Its long lasting nature greatly reduces maintenance time and the glass cover design makes maintenance even easier.

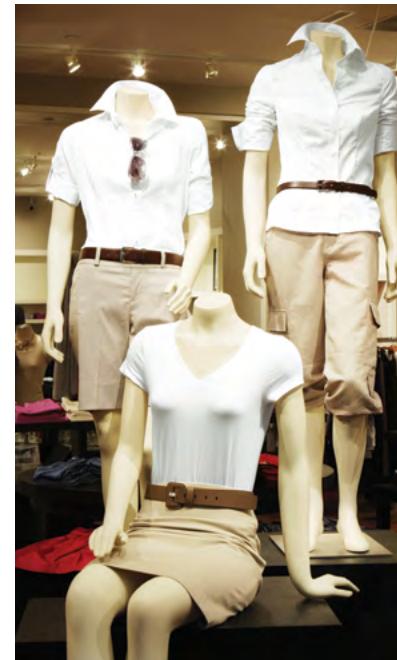

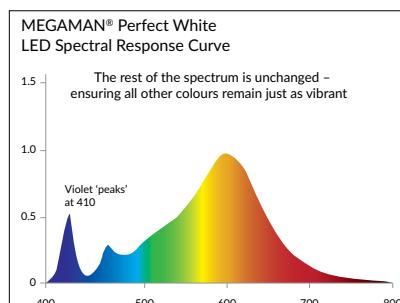

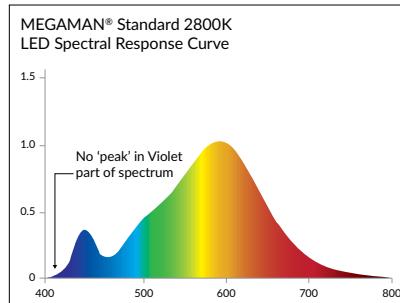

So how does it work?

MEGAMAN®'s Perfect White introduces violet light with a peak at 410nm in the near visible, non-harmful part of the spectrum - also found in natural sunlight - to provide an output that closely mimics the effect of natural daylight on white objects.

How does MEGAMAN® achieve this?

Many white objects and especially textiles found in retail stores contain Fluorescent Whitening Agents (FWAs) which, when excited, fluoresce – giving the object a brighter and livelier appearance. This is why clothes often look better when shown in natural daylight. Importantly the violet element within MEGAMAN®'s Perfect White technology, leaves the rest of the spectrum unchanged - so other colours maintain their vibrancy too. The violet just excites the FWAs, producing a 'Perfect' white finish that not only makes the product leap out from any background but increases contrast. As a result retail shops, in particular fashion stores, will find their merchandise more attractive and convincing when exposed to Perfect White's light source.

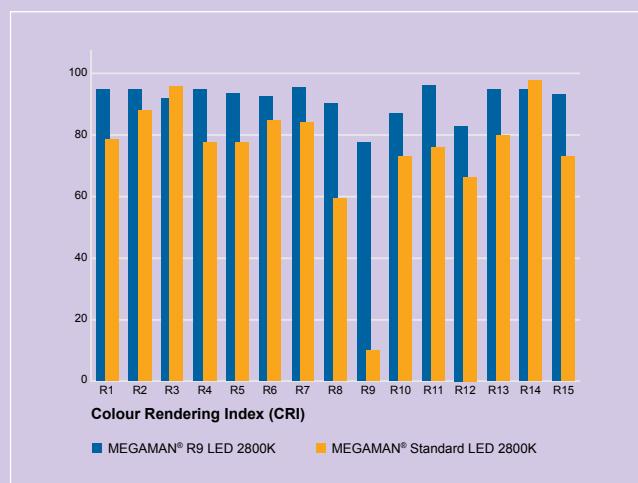

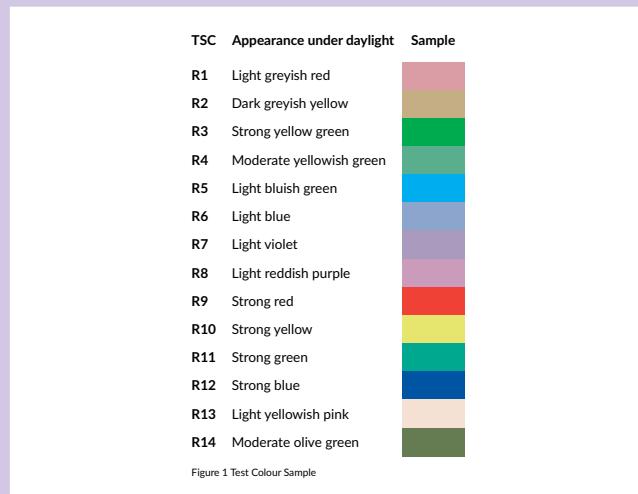

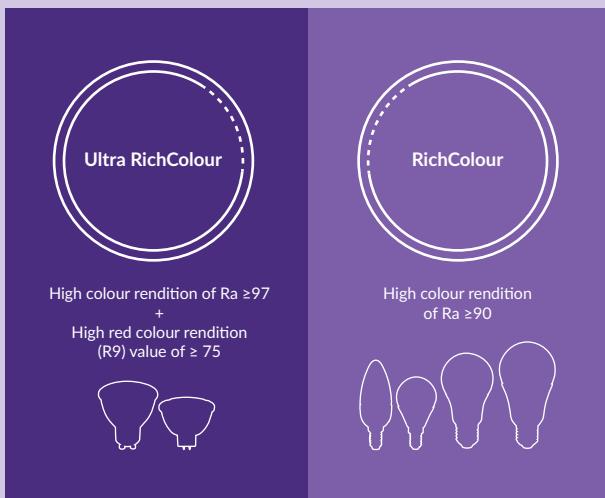

RichColour

MEGAMAN® RichColour is a range of LED lamps designed to maximise the richness and quality of colours. With high colour rendering of Ra90 or above, MEGAMAN® RichColour is the perfect LED replacement for halogen lamps in applications where the faithful colour reproduction associated with natural light is crucial. These places include retail stores, art galleries and museums.

Ultra RichColour

Taking colour enhancement yet a step further, MEGAMAN® Ultra RichColour combines all the benefits of standard RichColour technology with even better color rendering quality of up to Ra97, featuring enhanced red colour rendition (R9) of ≥ 75 - maximising the visual impact of meat, fresh fruit and vegetables. The well-balanced and high quality light of Ultra RichColour lamps makes them the perfect choice for food and other display lighting applications where the visual appeal of items is essential.

When we determine the general colour rendering index, the first eight colours in the Test Colour Sample (TCS; see Figure 1) defined in accordance with DIN 6169 are employed for the calculation. In addition to these eight colours (R1 to R8), there are another six colours (R9 to R14) that are more vivid and known as "saturated" colours.

The MEGAMAN® Ultra RichColour lamp not only has high colour rendering index of Ra97 and a high red colour rendition (R9) value of ≥ 75 , but it also has a high value of the other "saturated" colours (R10 to R14), which allows the beautiful red of an object to be revealed and creates well-balanced and high-quality lighting.

Dim to Warm

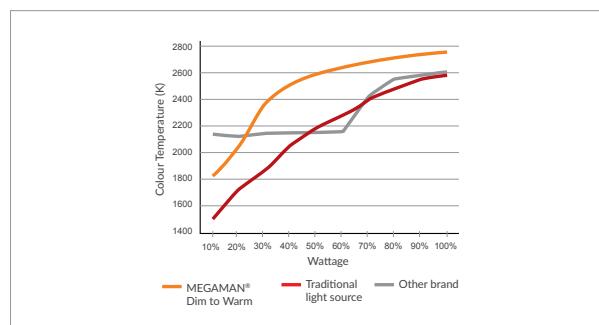

Improved dimming performance with the warmth of Halogen

MEGAMAN® is proud to be the first to introduce a wide range of LED products incorporating a brand new Dim to Warm technology. These LED lamps emit a warmer light when they are dimmed. The colour temperature of these LED lamps changes from 2800K (2700K) to 1800K when the lamps are dimmed from 100% to 10% (from 100% to 1% for LED AR111 and LED MR16 constant current types), perfectly simulating the characteristics of incandescent and halogen lamps.

Unlike many products on the market which use multiple lens arrays, MEGAMAN®'s Dim to Warm lamps contain a unique single circuit chip level technical solution, allowing them to have the same compact profile as incandescent and halogen lamps while also replicating their warmth and dimming curve. The MEGAMAN® LED lamps with the Dim to Warm feature are true replacements for incandescent and halogen lamps in terms of the outlook, size, lighting effect and produce lighting performance that is familiar to consumers.

MEGAMAN® Dim to Warm is the LED lamp that dims like traditional light sources. Moving through a wide colour temperature range of 2800K (2700K) to 1800K as the lamps dim from 100% to 10%, the close replication of the dimming curve of halogen and incandescent makes MEGAMAN® Dim to WARM a unique offering to the LED market.

Step to Warm

Step to WARM

LED lamp with a 'built-in dimmer'

MEGAMAN® launched an LED product range with a 'built-in dimmer' that offers LED lamps with a step dimming feature. These LED lamps provide a convenient, simple and instant way to adjust the brightness level to 100% and 30% with the use of any standard (ON/OFF) switch.

This new product range is designed to offer you the flexibility to create the perfect mood for any occasion. The LED lamps available in this range include the Candle, Classic, PAR16 reflector, R50 reflector, R63 reflector and GX53, they offer excellent light output for different household and commercial applications. With the step dimming technology embedded in the LED lamp, users can enjoy reduced electricity costs when the lamp is dimmed.

Warm White	Extra Warm White	Colour Temperature	
Setting 1 Colour Temperature • 2700K	Setting 2 Colour Temperature • 2200K	MEGAMAN®	

Comparison photos

The selectable colour temperatures: 2700K and 2200K

2-Step Dimming

2-Step Dimming

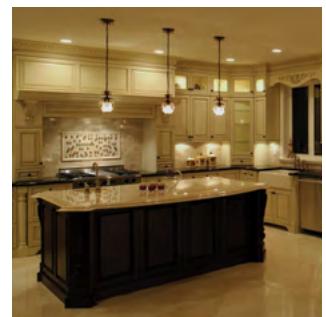

MEGAMAN® launched different LED products with built-in dimmer that offers LED lamps with a 2 steps dimming feature. These LED lamps provide a convenient, simple and instant way to adjust the brightness level between 100% and 30% with the use of any standard (ON/OFF) switch. Even at low light levels, the lighting performance of MEGAMAN® lamps are stable and perfect for creating more relaxing scenes.

2-Step Dimming technology offers you the flexibility to create the perfect mood for any occasion. With this technology, tone and ambiance of a room can be more accurately set according to the activities to be performed in the room. This also increase the room's functionality by controlling the light output for different household and commercial applications. With the 2 steps dimming technology embedded in the LED lamp, users can enjoy reduced electricity costs and save energy when the lamp is dimmed.

Two adjustable brightness levels:
100%, 30%

100% Lumen output:
Bright and effulgent, best
for environment requiring
concentration

30% Lumen output:
Soft and dimmed, best for cozy
mood setting and improving
room's aesthetic appeal

Dim the LED lamp with
any ordinary light switch

A convenient and simple way to
create the perfect mood for any
occasion

Voltage

V0100	AC 100
V0110	AC 110 - 120 V
V0120	AC100 - 120V
V0127	AC 100 - 127V
V0240	AC 220 - 240 V
AC120	AC120V
AC220	AC220V
AC012	AC12V
DC012	DC12V
DC020	DC20V
DC036	DC36V
AD012	AC/DC12V
U0277	AC 100 - 277V
U0240	AC 100 - 240V
C1050	1050mA

First letter 'V' stands for Voltage

First letter 'U' stands for Universal (Wide voltage)

First two letters 'AC' stands for fixed AC voltage

First two letters 'DC' stands for fixed DC voltage

First two letters 'AD' stands for AC and DC operable

First letter 'C' stands for Current

Smarten Up Your Space with **INGENIUM® ZB**

Working with ZigBee® technology, **INGENIUM® ZB** is a scalable smart lighting solution, which allows users to gain wireless control over all **INGENIUM® ZB** products for high-end applications. Allowing control up to 50 devices simultaneously, **INGENIUM® ZB** is perfect for anyone looking to add smart control to residential and commercial spaces.

Smart Lighting Solution

Gateway

Universal Dimming Module

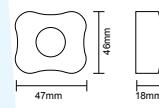

Technical Specification

Model No.:	GW601/z1-EU
	GW601/z1-UK
Input:	100-240V~ 50/60Hz.
Power Supply:	External adaptor (5V DC 1A)
WAN Options:	Ethernet
Connectivity:	Connects up to 50 devices max. in a mesh network
No. of Groups supports	30
No. of Scenes supports	30
No. of Rules supports	30
Control Unit:	Smart device with APP (iOS and Android), INGENIUM® ZB remote controllers
Accessory Included:	Power adaptor with UK, EU or AU plugs, LAN cable
System:	Compatible with INGENIUM® ZB products and Zigbee® Certified Product

Dimming Module

Technical Specification

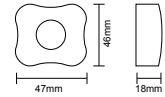

Model No.:	ZBM02d
Input:	220-240V~ 50Hz
Output:	Typical 5VA-150VA (LED), or 25W-300W (resistive load)
Dimming:	100-10% (by INGENIUM® ZB control)
Dimming Type:	Trailing-edge
Wiring:	2 wires (live and output)
Operating Temp.:	0°C to +40°C
System:	Compatible with INGENIUM® ZB products and Zigbee® Certified Product

Technical Specification

Model No.:	ZBM01d
Input:	220-240V~ 50Hz
Max. Output:	250VA (LED), or 500W (resistive loads)
Dimming:	100-10% (by INGENIUM® ZB control)
Dimming Type:	Leading-edge and Trailing-edge (auto dimming mode selection)
Wiring:	3 wires (live, output and neutral), optional switch wiring for direct control with a momentary wall switch
Operating Temp.:	-20°C to +45°C
System:	Compatible with INGENIUM® ZB products and Zigbee® Certified Product

Mains Switching Module

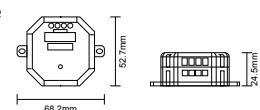

Technical Specification

Model No.:	ZBM02sr
Input:	220-240V~ 50Hz
Output:	Resistive load 1.3A max. LED 300VA typical
Wiring:	3 wires (live, neutral and output)
Operating Temp.:	0°C to +40°C
System:	Compatible with INGENIUM® ZB products and Zigbee® Certified Product

250W Dimming Module

Technical Specification

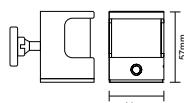

Model No.:	DM601/z1
Input:	220-240V~ 50Hz
Output:	Typical 5VA-250VA (LED)
Dimming:	100-10% (by INGENIUM® ZB control)
Dimming Type:	Trailing-edge and Leading-edge (manual mode selection)
Wiring:	2 wires (live and output)
Operating Temp.:	-10°C to +55°C
System:	Compatible with INGENIUM® ZB products and Zigbee® Certified Product

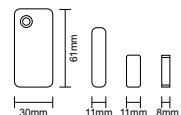

Smart Lighting Solution

PIR Sensor

Magnetic ON/ OFF Sensor

Technical Specification

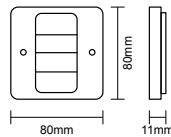

Model No.:	PS601/z1
Input:	AAA alkaline battery x2pcs (included)
Detection angle:	120° (horizontal) 60° (vertical)
System:	Compatible with INGENIUM® ZB products

Technical Specification

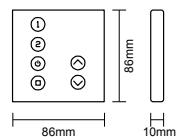

Model No.:	MS601/z1
Input:	3V CR2032 x1pc (included)
System:	Compatible with INGENIUM® ZB products

Scene Controller

Wall-Mounted Controller

Technical Specification

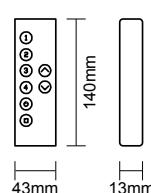

Model No.:	WC601/z1
Input:	3V CR2025 x1pc (Included)
Function:	ON/OFF, dimming and scene control
Wall plate size:	L80 x W80 x H11 (mm) With magnetic holder design to accommodate the remote control unit
No. of scene:	3
No. of group:	1
System:	Compatible with INGENIUM® ZB products

Technical Specification

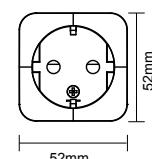

Model No.:	ZBW01-WH
Input:	2pcs of 3V CR2032 battery
Support:	Max. 2 groups
Function:	On/off and dimming
Accessory Included:	Magnetic holder and 2pcs of 3V CR2032 battery
System:	Compatible with INGENIUM® ZB products

Handheld Controller

Smart Socket Adaptor

Technical Specification

Model No.:	ZBH01-WH
Input:	2pcs of 3V CR2032 battery
Support:	Max. 4 groups
Function:	On/off and dimming
Accessory Included:	Magnetic holder and 2pcs of 3V CR2032 battery
System:	Compatible with INGENIUM® ZB products

Technical Specification

Model No.:	PA601/Z1-EU, PA601/z1-UK
Input:	220-240V~ 50Hz
Max. Loading:	3,600W
Plug Options:	EU and UK
System:	Compatible with INGENIUM® ZB products and Zigbee® 3.0 Certified Product

LED by
MEGAMAN®

AR111

MEGAMAN® offers a comprehensive Professional series of LED AR111 reflectors for 50W and 75W halogen AR111 replacement with our unique technology which increases functionality and flexibility for different environments.

Product Features

- Dual Beam Technology offers a flexible choice of beam angles in one single lamp
- Perfect White technology intensifies white colour by exciting fluorescent whitening agents
- Ultra RichColour maximises the richness and quality of colours, especially red colour rendition (R9) of >75
- Offers perfect linear dimming and is tested and compatible with 130pcs most popular EU dimmers
- Broad compatibility with transformers
- SDCM ≤4
- Life time of 40,000hrs

PAR16

MEGAMAN® LED PAR16 comes with the Dual Beam Technology which offers a flexible choice of beam angle in one single lamp and MEGAMAN® Hybrid Reflector with enhanced beam control and efficacy. Different dimmable version is available drive further efficiencies, while helping to create the desired atmosphere, both Dim to Warm and Step to Warm create a warm and relaxing atmosphere by triac dimmer and ON/OFF switch.

Product Features

- Ultra RichColour maximises the richness and quality of colours, especially red colour rendition (R9) of >75
- Offers perfect linear dimming and is tested and compatible with 130pcs most popular EU dimmers
- Lifetime of 15,000hrs to 25,000hrs
- Various beam angle available, including 8°, 24°, 35°, 40°, 60° and 100°
- Halogen-like appearance for glass version
- Options to work under fire rated downlights

MR16

MEGAMAN® LED MR16 reflector has the same compact profile as halogen MR16 and delivers superb lighting performance, excellent light efficiency and better glare control for both accent and ambient lighting applications.

Product Features

- Constant Current MR16 works with DALI, DSI, 1-10V dimming drivers, it works with MEGAMAN® driver which drive 3pcs of lamp with synchronized start-up time
- Work well with AC 12V halogen transformers and generate much less heat
- Various beam angle available from narrow spot lighting to narrow and wide flood
- Life time up to 40,000hrs

* Capable of linear dimming when working with DALI, DSI or 1-10V dimming drivers, and the dimming performance depends on the specification of driver.

PAR20, PAR30S, PAR38

MEGAMAN® LED PAR reflectors with diffuser glass design can directly replace traditional halogen lamp equivalents with the same profile and excellent light output, distributing soft and comfortable lighting evenly without glare.

Product Features

- IP66-rated outdoor used PAR38 is available
- Dimmable version available, allowing users to adjust brightness level from 100% to 10%
- Life time up to 30,000hrs

R50, R63, R80

The MEGAMAN® LED R50, R63 and R80 delivers impressive spot lighting which a perfect retrofit replacement for halogen or incandescent spots.

Product Features

- Plastic and glass version are also available
- Dimmable version available for glass version, allowing users to adjust brightness level from 100% to 10%
- Compatible with existing fixture with E27 holders
- Life time of 15,000hrs

220-240V Plastic Version Flicker Free ≤3%

MR11

MEGAMAN® LED MR11 reflector is an ideal retrofit to halogen spot lighting, the small profile LED MR11 is perfect for use in merchandise display areas.

Product Features

- Superb light output of up to 600cd with 4W power consumption
- Up to 80% energy saving compared with halogen lamps
- Life Time of 25,000hrs
- Broad compatibility with transformers

ST64

220-240V

The MEGAMAN®LED Filament ST64 series combine the traditional glamour of incandescent bulbs with efficiency of LED, ideal for decorative application

Product Features

- Long life time
- Clear or golden design available
- Golden Filament (2000K) offers a ultra-warm and cosy atmosphere

GX53

The MEGAMAN® LED GX53 provides an integral LED solution for narrow surface mounted luminaires and recessed fittings of general and ambient lightings.

Product Features

- Compact dimension with low profile design
- Both dimmable and non-dim version are available
- Even light distribution and soft lighting
- Long life time up to 25,000hrs
- High efficacy of up to 108lm/W

T-LAMP

MEGAMAN® LED T-lamp delivers the same light output as its 40W incandescent counterpart, but consumes at least far less energy, allowing this series to be the ideal light source for domestic refrigerators and for general decorative purposes.

- Product Features
- Dimmable and non-dim version available
- Even light distribution and soft lighting
- High efficacy, consumes at least 82% less energy

LILIPUT

MEGAMAN® LED Liliput is perfect replacement for 47W incandescent and 11W CFL lamps with its high lumen output and high efficacy. It perfectly fits luminaires with narrow cover or limited space.

Product Features

- Compact in size, with a diameter of only 40mm
- High lumen output of up to 1055lm
- Efficacy of up to 124lm/W

G4

MEGAMAN® LED G4 utilizes advanced sub-miniature LED technology, which gives the series same sparkling effects and form as halogen G4, making it an ideal energy saving alternative to the halogen G4, which best fit into intricate or compact luminaires or chandeliers, creating the desired atmosphere instantly.

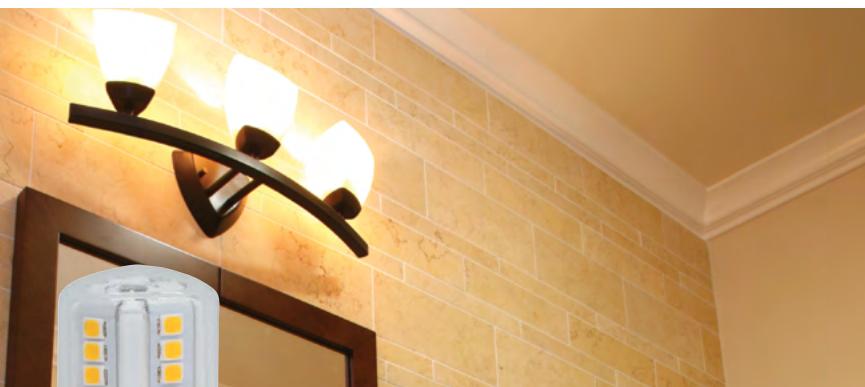

Product Features

- Efficacy of up to 111lm/W
- Long time up to 15,000hrs

CROWN SILVER

With the unique silver-plated crown top and clear light bulb finishing, MEGAMAN® LED Crown Silver is best for flawless mirror lighting and decorative lighting with an aesthetic touch. It delivers non-glare lighting just like incandescent lamp with silver coating, whilst greatly reducing electricity and maintenance costs.

Product Features

- Dimmable and non-dim version available
- Luminous efficacy of up to 105 lm/W

* Please refer to page 60 to 61 for the compatibility list.

T8 TUBE

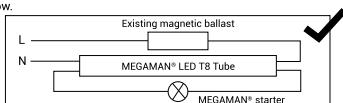

MEGAMAN® LED T8's smooth appearance and even light distribution achieved by wide exit window closely resembles traditional fluorescent T8 tube.

Product Features

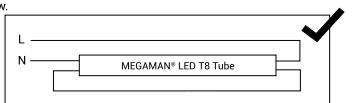

- Flicker free ≤3% provides maximum visual comfort
- High efficacy of up to 167 lm/W
- Lifetime of up to 50,000 hours
- Operating temperature ranges from -30° to 65°

If magnetic ballast and starter are available, wiring method is shown below.

If magnetic ballast and starter are not available, wiring method is shown below.

CLUSTERLITE®

MEGAMAN® LED CLUSTERLITE® is specifically designed to replace Mercury tungsten blended lamps and metal halide lamps used in commercial and industrial areas. MEGAMAN® LED Clusterlite® has phenomenal attributes compared to high pressure discharge lamps; including high lumen maintenance, even light distribution, good colour rendering, high colour uniformity, negligible colour shift and excellent energy-savings.

Product Features

- Compact tubing design for maximum lumen output
- Extremely high lumen output of up to 11,500 lm
- High efficacy of up to 152lm/W
- Lifetime of up to 50,000 hours
- Passive cooling and active cooling options available
- 4kV surge protection
- Free of harmful UV and radioactive Kr85
- Ultra-warm light available with colour temperature of 2000K for sodium lamp replacement

220-240V

*4kV Surge Protection

- The LED CLUSTERLITE® is not water resistant. The waterproof performance of the lamp would only be attained if the lamp is used with a fittings with IP rating of IP44 or above
- The ambient temperature inside the fixture must not exceed 60°C, which is equivalent to a minimum volume of 120 x 360 x 220(mm)
- The ambient temperature for LH201080-OPv00 inside the fixture must not exceed 40°C, which is equivalent to a minimum volume of 580 x 580 x 400(mm)
- The noise level for LH0132 is 23dB in an enclosed fixture and 35dB when free burning
- The noise level for LH0133 and LH0246 is 28dB in an enclosed fixture and 40dB when free burning
- The noise level for LH201080-OPv00 is 40dB when free burning

PLANT LAMP

MEGAMAN® LED Plant Lamp series is an eco-friendly solution for horticulture lighting to assist plants in the photosynthesis process without adding extra heat, which can increase the plant yield.

Product Features

- Up to IP55, protecting the light source from water and dust
- More control over cultivation with custom light recipes, to meet specific needs of specific crops
- Tailored light spectrum for enhance nutritional value and quantity
- Sustainable crop cultivation for shorter growth cycles and healthier crop growth

220-240V

MEGAMAN® HORTICULTURE LIGHTING

Important Segments for Horticulture Lighting

- Ceiling Lighting

- Multilayer Cultivation

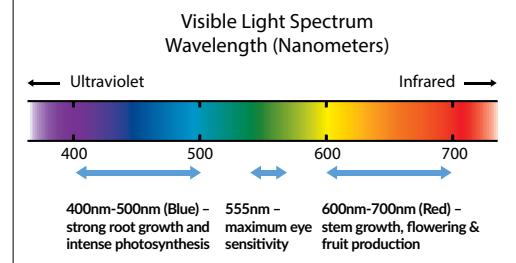

Artificial lighting is necessary because:

- Supplemental lighting
- Photoperiodic lighting
- Cultivation without daylight

Plant	Visible Light Spectrum	Effect on Plant	Reference
Cabbage	660nm (Red)	Increased anthocyanin content	1
Baby Leaf Lettuce	658nm (Red)	Phenolics concentration increased by 6%	2
Tomato	660nm (Red)	Increased tomato yield	3
Kale Plants	640nm (Red)	Lutein and chlorophyll a, b accumulation increased	4
Lettuce	638nm (Red)	Increased vitamin C content in mustard, spinach and green onions	5
Green Onions	638nm (Red)	Reduction of nitrate content	5

SENSOR LIGHT

Equipped with an ingenious light sensor, the MEGAMAN® LED Sensor Light automatically lights up in darkness and turns itself off in a bright environment, helping to conserve energy.

Product Features

- Built-in sensors or front & back sensor design
- Automatic detection of surrounding brightness level with high sensitivity and wide range
- High efficacy of up to 125 lm/W

FIRE LAMP

220-
240V

MEGAMAN® LED Fire Lamp is designed to look like real flickering flames without generating heat like real fire. This series is the ideal application for lanterns and other decorative fixtures, and can be used base up or base down.

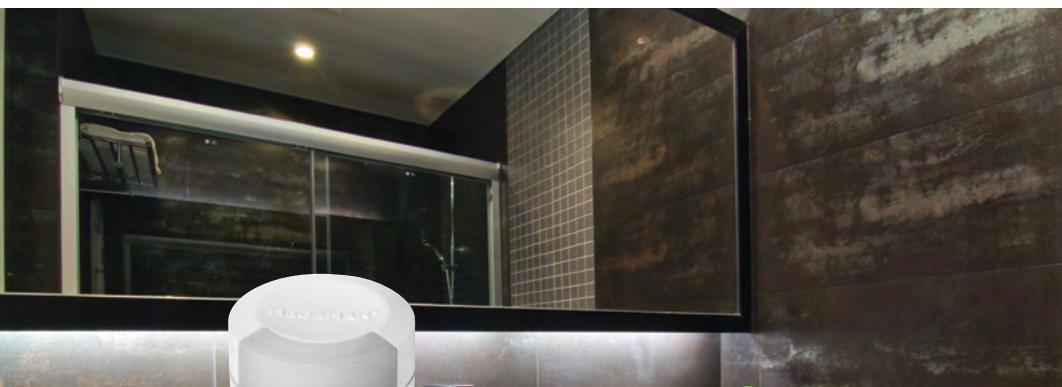

Product Features

- Extremely warm light available with colour temperature of 1400K
- Mimics real flame effect without danger and inconvenience of open flame, hot wax or smoke
- Lifetime of 25,000 hours

NIGHT LIGHT

MEGAMAN® LED Night Light shine through the dark and give user a sense of security indoor or outdoor. Its low heat design makes it much safer than incandescent bulbs.

Product Features

- Different light colour options
- High efficacy with only 0.2W
- Various plug type
